Crompton

Fans

Dear Customer,

We thank you for choosing Crompton as your preferred brand for fulfilling your décor choices. We are delighted that you are now part of the Crompton legacy!

Our products are crafted with an obsession to detail and feature industry leading innovations like Anti-Dust fans and Duratech technology.

In this catalogue, you will find our latest range of energy efficient ceiling fans with ActivPower & ActivBLDC technology. Our range of energy efficient ceiling fans will provide you with unparalleled savings on your electricity bills. Furthermore, energy efficiency as a feature, is available across all our product segments to suit your needs.

We have also included a section to help you choose the recommended design and color for your home décor.

Happy surfing !

About Us

For more than 80 years, our brand has stood for trust, reliability, dependability and excellence in the area of electrical engineering. We endeavour to provide meaningful benefits, ease of use, great design, superior performance and durability at the right price to our customers. Our range of innovative products caters to the modern consumer needs like easy to clean (Anti-Dust) fans, easy to maintain Air Coolers, Hygienic Lighting Solutions (Anti-Bac LEDs), Pumps and many more.

Today, we are a **Proud Indian Brand and No. 1* in Fans** with a strong presence in the other categories like Pumps, Water Heaters, Air Coolers, Kitchen Appliances and lighting.

*As per 3rd party retail audit and industry data.

Our Range of Innovative Products

SILENTPRO

2X MORE SILENT*
THAN REGULAR FANS

ENERGION

* Up to 50% Energy Saving as compared to a regular ceiling fan operating at the same RPM.

* Most regular ceiling fans operate at 64dB. Every increase of 10 dB in noise level is perceived to be twice as loud.

SilentPro operates at 52dB level thereby making it twice more silent than its conventional counterparts.

Due to continuous product improvement, the product illustrated in this catalogue may vary slightly from the actual product.

Award Winning Designs

Crompton is synonymous with best in class and internationally awarded designs. Our fans are a work of art in themselves and are a statement piece for your home aesthetics.

Recognitions in Energy Saving

We are delighted to be awarded the National Energy Conservation Award* 6 YEARS IN A ROW!

Ranked No.1 by Consumers

Crompton's Star 220 ceiling fan was ranked No.1 and the only fan that delivers on the BEE 5 Star rating for energy efficiency by Consumer Voice*.

*Consumer Voice is an independent organisation that conducts independent, comparative and unbiased product trials recognized by the Ministry of Consumer Affairs.

*National Energy Conservation Award (NECA) is given every year for exceptional achievement in Energy Efficiency. This is awarded by Bureau of Energy Efficiency (a department under Ministry of Power, Government of India) for Energy Efficient Appliances.

Manufacturing Excellence

With improving Consumer preferences and to meet the ever increasing market demand of Crompton's durable products, we have multiple state-of-the-art manufacturing facilities at Goa & Baddi which employ the most modern technologies such as Automated Stator winding and Die Casting units which offer best in class products with highest quality standards.

Innovations driven by R&D and Consumer Research

For more than 8 decades, Crompton is known for trust, reliability and durability of its fans and is crowned as the pioneer in fan motor technology.

We leverage our robust R&D processes and capabilities, which are further enhanced by our close consumer connect - to offer superior technology based lifestyle solutions.

Innovations over the years

2016

Anti-Dust fans:

Fans with Dust-resistant Nano technology paint for hassle free cleaning and 50% less dust.

2017

Air 360 fans:

Aerodynamic blades with Anti-drag design for smoother air flow and 50% more coverage.

2018

VSense fans:

Fans with Smart Sensor technology which rotates at High Speed in low voltage conditions.

2019

Duratech fans:

Fans with Premium components & 5-year warranty designed to deliver superlative performance.

2020

Energreen fans:

Energy Efficient fans with ActivBLDC motor that save up to 50% Electricity costs

2020

SilentPro fans:

Elite range of fans with aerodynamic ABS body with Silent Operation & Energy Efficient ActivBLDC motor.

2021

Smart fans:

Fans that are operated using mobile application, voice control devices and remote.

2023

Active Power Technology:

Energy Efficient fans with ActivePower Induction motor that consume up to 33% less Electricity.

2025

Nucleus:

Nucleus which focused on building inhouse BLDC platform thereby ensuring superior reliability, scalability & robustness in our BLDC fans.

2025

X Tech:

XTech motor technology for induction motors ensuring that all ceiling fans comply with the BEE standards and have a minimum of 1 star rating and are progressively energy efficient and ready for future stricter BEE transitions of the future.

Fan Selection Guide

Step 1

Compare your décor

Step 2

Select Fan Model

Select Fan color

Step 3

Browse through the technical details

Selection tips - Ceiling Fans

Tip 1:

Match your ceiling color with your fan color to make the room look spacious.

Tip 2:

To accentuate your ceiling choose the contrasting furniture color for your fan.

Tip 3:

Metallic trims in fan go well with décor that have shiny elements within the space.

Tip 4:

Decorated fans complement spaces with classic or luxurious settings.

Tip 5:

For spaces with high maintenance, choose our anti-dust ceiling fans range.

Tip 6:

For places where you need quiet comfort, choose silent operation fans.

Tip 7:

For spaces with continual requirement of fan, choose energy efficient fans.

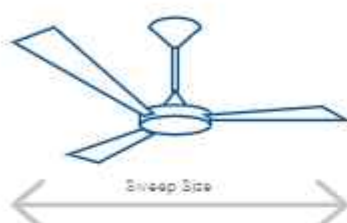

Tip 8:

For usage comfort and convenience, choose Smart (IoT enabled) fans.

Technical Advice

Ceiling Fan Selection

How to select your fan?

Sweep Size is referred to the entire diameter of a fan.

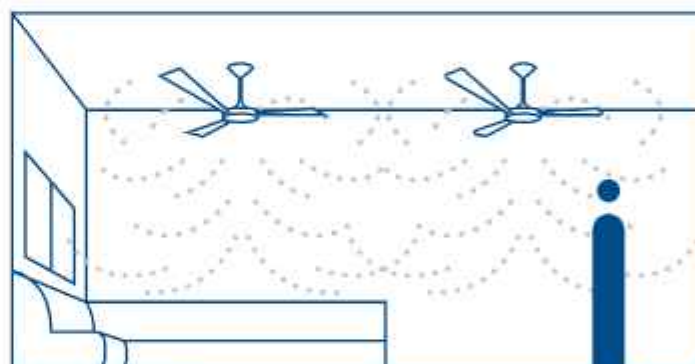

Higher RPM does not mean higher air flow. Air flow / Air delivery is the only point of comparison in selecting a ceiling fan.

More fan blades may not give better air flow. A four or five blade ceiling fan provides a more conventional, balanced look, whereas a fan with two or three blades possesses a modern and sleek style.

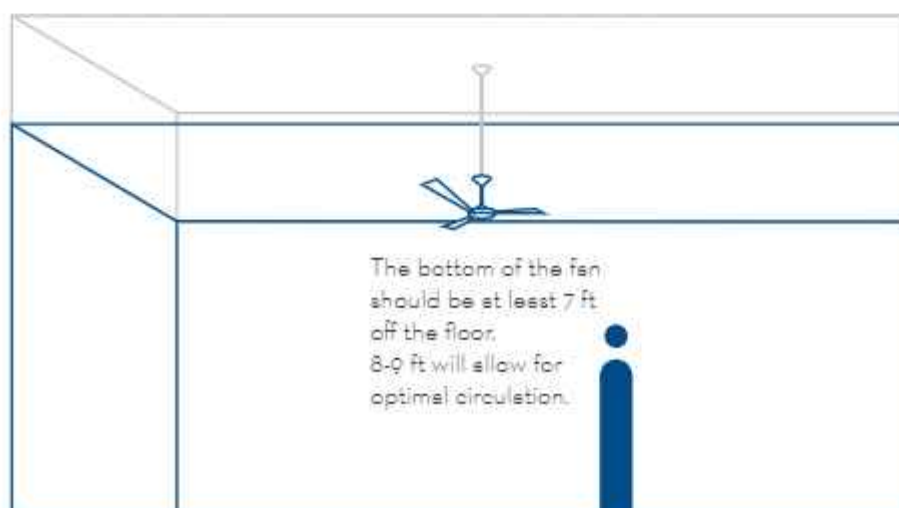

Sweep Size	Room Size
600 mm (24")	Small shop, cabin or Powder Room
750 mm (30")	6 X 10 ft
900 mm (36")	7 X 10 ft
1050 mm (42")	10 X 10 ft
1200 mm (48")	12 X 13 ft
1300 mm (52")	13 X 14 ft
1400 mm (56")	14 X 16 ft

For a much more larger room, consider using two fans to balance the air circulation in all parts.

Optimal Height

For ceilings that are taller than nine feet, add 6" to the downrod for every foot of height.

The more space between the ceiling and the blades, the better for air flow and circulation:

- 10 ft
- 9 ft
- 8 ft } Optimal height
- 7 ft
- 6 ft
- 5 ft
- 4 ft
- 3 ft
- 2 ft
- 1 ft
- 0 ft

We Present to you our wide range of energy efficient ceiling fans which are compliant with the new standards set out by Indian Bureau of Energy Efficiency.

New Star Rating System

$$\text{Service Value} = \frac{\text{Air Delivery (m}^3/\text{min)}}{\text{Wattage (W)}}$$

Higher the service value (air delivery/watt), better is the star rating of the fan!

Star Levels					
For ≥1200mm sweep size fan Rated Service Value	≥4.0 to <4.5	≥4.5 to <5.0	≥5.0 to <5.5	≥5.5 to <6.0	≥6.0
For <1200mm sweep size fan Rated Service Value	≥3.1 to <3.6	≥3.6 to <4.1	≥4.1 to <4.6	≥4.6 to <5.1	≥5.1

Minimum Specification*

Fan size Sweep Size mm	Minimum Air Delivery (m ³ /min)	Minimum Service Value (m ³ /min/W)
600	100	1.5
>600 and ≤750	115	1.7
>750 and ≤900	130	3.1
>900 and ≤1 050	150	3.1
>1 050 and ≤1 200	210	4.0
>1 200 and ≤1 320	220	4.0
>1 320 and ≤1 400	245	4.1
>1 400 and ≤1 500	270	4.3

Star Rating Label Locations

Primary Motor Box

Top End Shield

*As per 'Amendment No.1 October 2022 to IS374:2019 Electric Ceiling Type Fans - Specifications'

SUPER EFFICIENT MOTOR

Active components like windings, stampings, etc. make the motor more efficient with upto 25%+ higher efficiency.

LONGER MOTOR LIFE

With upto 50% less heating this motor is cooler as compared to a regular fan motor, resulting in its longer life.

SCANDINAVIAN DECOR

the 1990s, the number of people in the UK with a mental health problem has increased by 50% (Mental Health Foundation 2000). The prevalence of mental health problems in the UK is estimated to be 10% (Mental Health Foundation 2000).

There is a growing awareness of the need to address the needs of people with mental health problems. The UK government has set out a strategy for mental health care (Department of Health 1999). The strategy aims to improve the lives of people with mental health problems by providing them with the best possible care and support. The strategy also aims to reduce the stigma and discrimination that people with mental health problems often experience.

One of the key challenges in mental health care is how to provide care and support in a way that is respectful of the rights and dignity of people with mental health problems. This is a challenge because people with mental health problems often experience stigma and discrimination, which can make it difficult for them to access the care and support they need. It is also a challenge because people with mental health problems often have complex needs that require a range of different services and support.

One way to address these challenges is to develop a new model of mental health care that is based on the principles of recovery and empowerment. This model would focus on helping people with mental health problems to live their lives to the fullest and to achieve their goals. It would also focus on helping people with mental health problems to overcome the stigma and discrimination that they experience.

Another way to address these challenges is to develop a new model of mental health care that is based on the principles of community care and support. This model would focus on helping people with mental health problems to live in their communities and to receive the care and support they need. It would also focus on helping people with mental health problems to overcome the stigma and discrimination that they experience.

There are many different ways to develop a new model of mental health care. The key is to develop a model that is based on the principles of recovery and empowerment, community care and support, and respect for the rights and dignity of people with mental health problems. This is a challenge, but it is one that is worth the effort.

There are many different ways to develop a new model of mental health care. DURATECH TECHNOLOGY

Duratech Fans come with 5 years Duratech warranty. Duratech uses premium components, designed to deliver a superlative performance over the years.

Here's a quick look at the key components that form the core of the Duratech technology.

Duratech comprises of:

High Endurance Box Capacitor

Duratech's high-endurance box capacitor, with a patented adapter, ensures superior performance over a longer period as compared to ordinary oil-filled tube-type capacitors.

High Grade EMQ Bearing

EMQ bearings used for the Duratech motor are the highest-grade bearings available for fans. They are silent and smooth, and have the additional advantage of reduced friction and vibration.

Dual Coat Winding

Dual-coat winding, offers double protection, ensuring better insulation and abrasion resistance when subjected to high temperatures and sudden overloads. This results in longer durability as compared to ordinary winding.

High Standard Hybrid Steel

Duratech fans use hybrid steel which is highly compatible with electric motors. The composition and the thickness of the steel ensures fan durability and efficiency.

Birken Effect

the 1990s, the incidence of *S. flexneri* serotype 3 infections has increased in the United Kingdom [10]. In the United States, the incidence of *S. flexneri* serotype 3 infections has increased in the 1990s, but the incidence of *S. flexneri* serotype 4 infections has decreased [11].

There is a need to monitor the incidence of *S. flexneri* infections in the United Kingdom, and to monitor the incidence of *S. flexneri* serotype 3 infections in particular. The purpose of this study was to determine the incidence of *S. flexneri* infections in the United Kingdom in 1999, and to determine the incidence of *S. flexneri* serotype 3 infections in particular.

MATERIALS AND METHODS

Study area

The study was conducted in the United Kingdom, which has a population of approximately 55 million. The United Kingdom is divided into four countries: England, Scotland, Wales and Northern Ireland. The study was conducted in England, which has a population of approximately 48 million. The study was conducted in the United Kingdom, which has a population of approximately 55 million. The United Kingdom is divided into four countries: England, Scotland, Wales and Northern Ireland. The study was conducted in England, which has a population of approximately 48 million.

Study design

The study was a cross-sectional study. The study was conducted in the United Kingdom, which has a population of approximately 55 million. The United Kingdom is divided into four countries: England, Scotland, Wales and Northern Ireland. The study was conducted in England, which has a population of approximately 48 million.

Study population

The study population was the population of the United Kingdom, which has a population of approximately 55 million. The United Kingdom is divided into four countries: England, Scotland, Wales and Northern Ireland. The study was conducted in England, which has a population of approximately 48 million.

Study variables

The study variables were the incidence of *S. flexneri* infections, and the incidence of *S. flexneri* serotype 3 infections. The study was conducted in the United Kingdom, which has a population of approximately 55 million. The United Kingdom is divided into four countries: England, Scotland, Wales and Northern Ireland. The study was conducted in England, which has a population of approximately 48 million.

Study results

The study results showed that the incidence of *S. flexneri* infections in the United Kingdom in 1999 was 1.2 per 100,000. The incidence of *S. flexneri* serotype 3 infections in the United Kingdom in 1999 was 0.8 per 100,000. The study was conducted in the United Kingdom, which has a population of approximately 55 million. The United Kingdom is divided into four countries: England, Scotland, Wales and Northern Ireland. The study was conducted in England, which has a population of approximately 48 million.

TURBOBOOST TECHNOLOGY

○ UP TO 25% MORE AIR VELOCITY AT OPERATING ZONE*

Higher air velocity enhances air comfort by facilitating more cooling and promoting better air circulation.

○ 10%+ ACTIVE BLADE SURFACE AREA**

Increased active blade surface area enhances air delivery and overall comfort.

*Delivers up to 25% higher air velocity within a diameter range of 800mm to 1600mm from the centre of the fan, compared to a Crompton ceiling fan with an air delivery of 210 CMM.

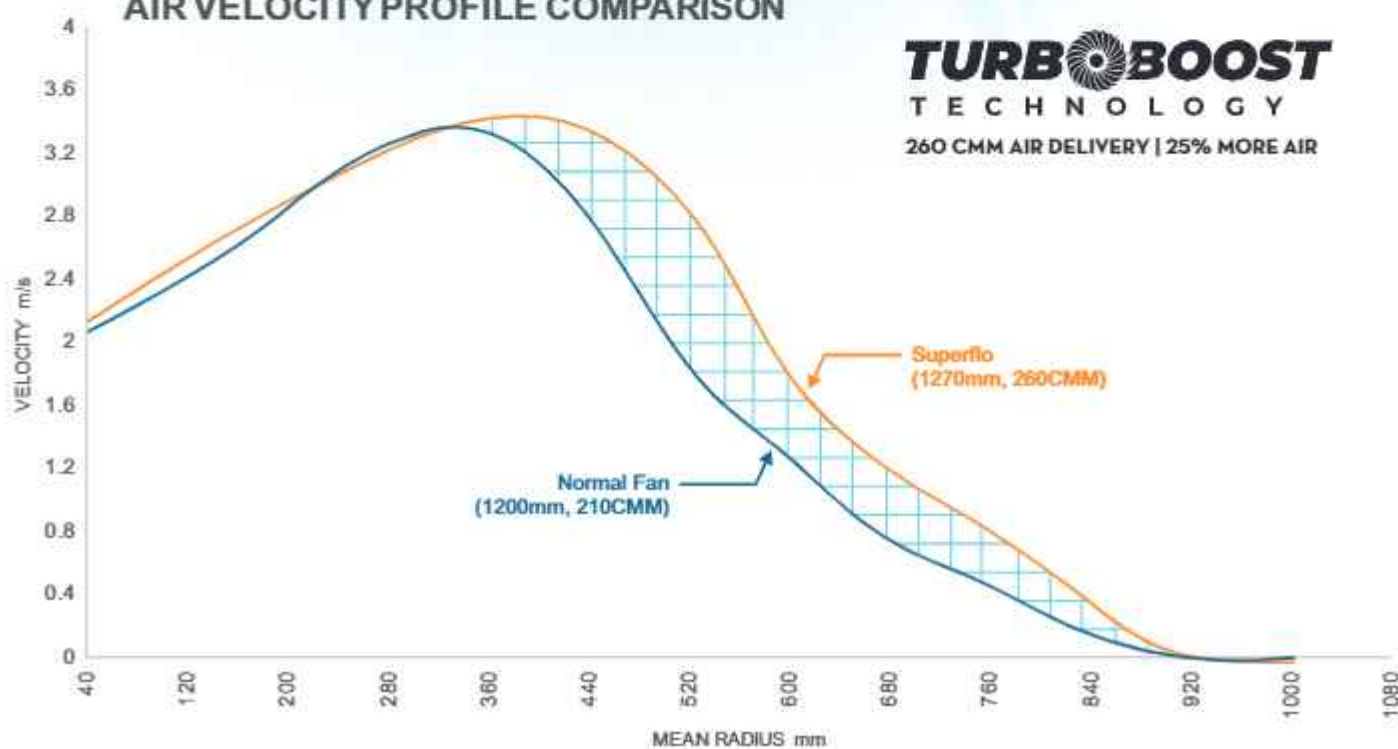

**10% more active blade surface area compared to a Crompton ceiling fan with an air delivery of 210 CMM.

Disclaimer - While every effort has been taken to ensure that all specifications and description are correct, this brochure should not be regarded as an infallible guide and not as an offer of sales for a particular product. Due to variables in production process, colours of actual products may vary slightly from those depicted. Model numbers and specifications are for reference only. May subject to change without prior notice.

***The Superflo's claim of India's highest air delivery fan (260 CMM air delivery) is based on internal laboratory tests conducted under ideal conditions and is applicable exclusively to Crompton's Metal Blade Induction ceiling fans in the 1200mm-1270mm sweep range. Actual performance may vary due to external factors. Crompton reserves the right to amend or withdraw this claim based on further testing or regulatory updates. Any Metal Blade Induction ceiling fan claiming superior air delivery must be registered with the Bureau of Energy Efficiency by December 31, 2024.**
